

## Mason Wasp

**A**ctive period of Adults: Spring and summer

**C**olor: Bright Orange and Black

**S**tatus / **D**istribution: common in NE Victoria also in NSW

**A**dditional notes: You'll find Masons hovering around mud and water as they use these materials to build the nests. These wasps can be dangerous.

If you see one of these, **DO NOT PROVOKE IT.**

**DECEMBER 2008**
